

Please amend the claims as follows:

Amendments to the Claims

1. (canceled)

2. (canceled)

3. (canceled)

4. (canceled)

5. (currently amended) A computer display support structure comprising:

a support member; and

a support arm connected to the support member, said support arm capable of supporting toward one end thereof a first computer display that displays a first image, and said support arm capable of supporting toward an opposite end thereof a second computer display that displays a second image, at least one of the ends being moveable between a first operating position in which the second image is viewable by a first person viewing the first image and a second operating position in which the second image is viewable by a second person opposite the first person viewing the first image, wherein at least one of the ends is extendable between a retracted configuration and an extended configuration, thereby varying the distance between the one end and the opposite end ~~first and second~~ computer displays.

6. (canceled)

7. (canceled)

8. (canceled)

9. (previously presented) A computer display support structure according to Claim 5, wherein both ends are extendable between the retracted and the extended configurations.

10. (canceled)

11. (currently amended) A computer display support structure according to ~~anyone of~~ Claims 5, ~~9 or 10~~, further comprising a joint on the support arm for connecting one of the first computer display and the second computer display to the support arm, wherein the joint allows the one display to pivot.

12. (previously presented) A computer display support structure according to Claim 11, wherein at least one of the first and second computer displays is pivotable between a portrait and landscape orientation.

13. (previously presented) A computer display support structure according to claim 12, wherein the ends are oriented vertically when the structure is in the first operating position.

14. (previously presented) A computer display support structure according to Claim 12, wherein the ends are oriented laterally when the structure is in the first operating position.

16. (canceled)

17. (canceled)

18. (canceled)

19. (canceled)

20. (new) A computer display support structure according to claim 5, wherein the support member includes a base, and a column connected thereto, the support arm being connected to the column.

21. (new) A computer display support structure according to claim 20, wherein the support arm includes a first support arm having the one end, and a second support arm having the opposite end.

22. (new) A computer display support structure according to claim 21, wherein the second support arm is adapted to telescope.

23. (new) A computer display support structure according to claim 21, wherein the base is adapted to rest on a horizontal surface, and when so disposed, the column is substantially vertical.

24. (new) A computer display support structure according to claim 5, further comprising the first computer display and the second computer display.

25. (new) A system for supporting a first display panel and a second display panel, the system comprising:

- a base;

- a column connected to the base;

- a first support arm connected to the column, said first support arm having a first mounting assembly for mounting the first display panel thereto; and

- a second support arm connected to and extendable from the first support arm, the second support arm having a second mounting assembly for mounting the second display panel thereto, wherein the second support arm includes a hinge that allows the second display panel to face away from the first display panel.

26. (new) The system of claim 25, wherein the second support arm telescopes relative to the first support arm.

27. (new) The system of claim 25, wherein the column and the first support arm are substantially vertical when the base rests on a horizontal surface.

28. (new) The system of claim 25, wherein the hinge and the second support arm allow the first display panel and the second display panel to be folded together facing each other.

29. (new) The system of claim 25, further comprising the first display panel and the second display panel.
